Circulation Research

SUBJECT INDEX

VOLUME XII — JANUARY-JUNE, 1963

A

Action potentials
changes produced by potassium, 415
in Purkinje and ventricular muscle fibers, 10

Adrenal glands, renal pressor function, 94

Adrenergic nerve, blockade and neurotransmitter store, 264

Analog computer
on-line computation of cardiac output from dilution curves, 379
removal of distortion from dilution curves, 131

Anephrotensin, relation to protein handling by kidney, 573

Anephrotensinogen, protein handling by kidney, 573

Anesthesia
halothane, and ventricular function, 63
pressor effects of increased cerebrospinal fluid pressure, 190
vertebral artery occlusion and, 190

Angiotensin
cardiovascular effects with epinephrine, singly and in combination, 393
renal hypertension, 553

Antirenin, juxtaglomerular cells, 525

Aorta
biochemistry of, 449
coaretation, experimental, 3
hypertension in coaretation, 3
turbulence of flow through, 455
vascular reactivity in coaretation, 3

Aortic regurgitation
comparison of dilution curves and electromagnetic flowmeter, 487
detection and measurement, 269

Arrhythmia
ouabain and thyroid function, 479
reticular activating system on, 14
stimulation of hypothalamus, 14

Arteries
biochemical alterations in, 449
carotid and cerebral arteriosclerosis in the rat, 659
conduction of heart sounds along, 308
lesions
and epinephrine, 449
humoral factor in production of, 291
neurogenic control of arterial pressure, 553
pulmonary, pressure transmission in, 623
pulmonary arterial tree
after reduction of pulmonary blood flow, 101
pressure transmission, 623
release of thromboplastin from arterial walls, 138
repair processes in, 449
septal
flow and resistance, 203
Thebesian drainage, 212
vertebral, occlusion and anesthesia, 190

Arteriosclerosis
in carotid and cerebral vessels in the rat, 659
humoral factor in, 291
production by reticuloendothelial system blockade, 291

Atherosclerosis, desmosterol deposition in, 228

Atrium, contractility, ouabain and calcium exchange, 620

B

Baroreceptors, effects on venous bed, 539

Blood
cell and plasma volume in splanchnic circulation, 22
thrombus formation in, 441

Blood flow
coronary
with intraventricular pressure, 322
by iodo-antipyrine, 58
dilution curves and electromagnetic flowmeter in aortic regurgitation, 487
measurement by indicators, 464
myocardial, resistance in deep vessels, 203
pulmonary, reduction, 101
renal
carbon monoxide effects, 361
hypoxia, effects, 361
in kidneys of rabbits, 353
low oxygen effects, 361
in septal artery, 203, 212
in skeletal muscle, 176
splanchnic, in histamine shock, 29
Thebesian drainage, 212

Blood pressure. *See also* Hypertension
cerebrospinal fluid pressure and vertebral artery occlusion, 190
feed-back loops in research, 585
influence on oxygen utilization of left ventricle, 163
intraventricular, derivatives and first heart sound, 386
neurogenic control of arterial pressure, 553
pressor effects, 94, 190, 553
pulmonary, transmission related to frequency and geometry, 623

Blood vessels
dimensions of, 375
passage of indicator through capillaries, 464
pulmonary, geometry and pressure transmission, 623

Blood volume
in peripheral vessels, 375
in splanchnic circulation
cell and plasma volume, 22
in histamine shock, 29

Brisket disease, pulmonary venoconstriction, 182

C

Calcium, ouabain affecting atrial uptake and tissue content, 620

Capillaries, passage of indicator through, 464

Capsules, implanted, measurement of interstitial fluid pressure by, 399
Carbohydrate metabolism, in heart, effects of isoproterenol, 76
Carbon monoxide, effects on renal circulation, 361
Cardiac murmurs
in ductus arteriosus, 85
flow and sound in distensible tubes, 651
Cardiac muscle. *See* Myocardium
Cardiac output
by dilution curves
comparison of injection sites, 317
distortion removed by computer, 131
on-line computation, 379
guanethidine effects, 298
Cardiomegaly
myocardium in
cellular changes, 170
properties of, 118
nucleic acid studies in, 170
Cardiovascular system, effects of epinephrine and angiotensin, singly and in combination, 393
Carotid artery, arteriosclerosis in the rat, 659
Carotid sinus
peripheral resistance, 152
reflexes, effects of vasoactive drugs, 539
Cebus fatuella, magnesium deficiency in, 642
Cells
cardiac necrosis and electrolytes, 55
changes in cardiomegaly, 170
juxtaglomerular, characteristics of, 525
volume and percentage in splanchnic circulation, 22
Cerebral artery, arteriosclerosis in the rat, 659
Cerebrospinal fluid pressure, pressor effect of increasing, 190
Chlorides, cardiac necroses, 55
Cholesterol
and lipid components of xanthomata, 472
in plaques of atherosclerosis, 228
Circulation, in the hagfish, 427
Coarctation of the aorta, hypertension and vascular reactivity in, 3
Computers
on-line computation of cardiac output, 379
removal of distortion from dilution curves, 131
Contractility
atrial, 620
of myocardium, 597
ouabain
and calcium exchange, 620
and thyroid function, 479
Coronary circulation
intraventricular pressure, 322
measured by iodo-antipyrine, 58
septal artery
flow and resistance, 203
Thebesian drainage, 212

D

Desmosterol, deposition in atherosclerosis, 228
Dilution curves. *See* Indicator dilution
2, 4 Dinitrophenol, electrical activity of cardiac muscle cell, 10
Discs, high-resistance, intercalated, in the myocardium, 676
Drainage, Thebesian, of septal artery, 212
Ductus arteriosus, murmurs in swine, 85
Dye dilution. *See* Indicator dilution

E

Eddy formation, and turbulence in flowing liquids, 455
Editorial, some a priori thoughts on editorship, 1
Electrical activity, effect of 2, 4 dinitrophenol, 10
Electrical resistivity, body tissue, 40
Electrocardiogram
distribution of potentials on thoracic surface of man, 341
magnesium deficiency in monkey, 642
potassium hemodialysis, 145
rabbit fetus, 51
Electrolytes, cardiac necroses, 55
Electromagnetic flowmeter, compared with dilution curves in aortic regurgitation, 487
Epinephrine
and arterial lesions, 449
cardiovascular effects with angiotensin, singly and in combination, 393
effects on venous tone, 539
release of thromboplastic substance, 138
Eptatretus stoutii, circulatory control mechanisms in, 427
Extracorporeal circulation, thrombus formation in blood, 441

F

Feed-back loops, and high blood pressure research, 585
Fetus, electrocardiogram in rabbit, 51
First heart sound, hemodynamic correlates, 386
Fish, circulatory control mechanisms in hagfish, 427
Flow. *See also* Blood flow
eddy formation and turbulence in flowing liquids, 455
sounds in distensible tubes, 651
Flowmeter, electromagnetic, compared with dilution curves in aortic regurgitation, 487
Fluid pressure
cerebrospinal, pressor effect of increasing, 190
interstitial, measurement by implanted capsules, 399
Fluorescent antibody technique, renin from juxtaglomerular cells, 525

G

Geometry, in relation to pressure transmission in pulmonary artery, 623
Glands, adrenal, renal pressor function, 94
Glomerular filtration rate, and renal vasomotor nerves in rabbit, 353
Glucose, potassium and electrocardiogram, 145
Guanethidine
adrenergic nerve blockade produced by, 264
hemodynamic effects in man, 298
norepinephrine depletion from heart, 256
on reflex venoconstriction, 539

H

Hagfish, circulatory control mechanisms in, 427

Halothane, ventricular function, 63

Heart
- action potential changes produced by potassium, 415
- arrest and potassium, 415
- arrhythmia
  - hypothalamus on production of, 14
  - ouabain-induced, 479
  - reticular activating system, 14
- carbohydrate metabolism of, 76
- cardiomegaly, 118, 170
- contractility
  - atrial, ouabain and calcium exchange, 620
  - of muscle, 597
  - ouabain and thyroid function, 479
- dinitrophenol on electrical activity, 10
- electrolytes and necroses, 55
- isoproterenol on carbohydrate metabolism of, 76
- metabolism
  - isoproterenol on, 76
  - of norepinephrine, 220
- murmurs
  - in ductus arteriosus, 85
  - flow and sounds in distensible tubes, 651
- muscle. *See* Myocardium
- necroses and electrolytes, 55
- norepinephrine
  - depletion with guanethidine and reserpine, 256
  - metabolism of, 220
- ouabain
  - on contractility, 479, 620
  - and thyroid function, 479
- outflow resistance, ventricular response to, 107
- output. *See* Cardiac output
- potassium and arrest, 415
- potentials, distribution on thoracic surface of man, 341
- sounds
  - conduction along arteries, 308
  - in distensible tubes, 651
  - first, hemodynamic correlates, 386
- ventricle. *See* Ventricle

Heart sounds
- conduction along arteries, 308
- in distensible tubes, 651
- first, hemodynamic correlates, 386

Hemodialysis, potassium and electrocardiogram, 145

Hemorrhage, control of total vascular resistance in shock in dogs, 667

Histamine, shock and splanchnic circulation, 29

Humoral factors
- in production of arterial lesions, 291
- in renal hypertension, 553

Hypercapnia, effects on venous tone, 539

Hyperemia, regulation in skeletal muscle, 176

Hypertension
- in coarctation of the aorta, 3
- feed-back loops in research, 585
- guanethidine effects, 298
- pressor effects of increased cerebrospinal fluid pressure and vertebral artery occlusion, 190
- protein handling by kidney, 573
- renal
  - and angiotensin, 553
  - humoral factors, 553
  - in monkeys, 241
  - neurogenic control of arterial pressure, 553
  - neurogenic control of peripheral resistance, 562
- renal pressor function in adrenal glands, 94
- renoprival, effect of salt on, 508
- systems analysis in research, 585
- vascular reactivity, 3
- vasoactive mechanisms (Proceedings of Council for High Blood Pressure Research, American Heart Association), 523-598

Hypophysectomy, cardiovascular effects of thyroxine, 333

Hypothalamus, production of arrhythmia, 14

Hypoxia
- effects on renal circulation, 361
- effects on venous tone, 539

I

Indicator dilution
- in aortic regurgitation, 269, 487
- curves
  - in aortic regurgitation, 269, 487
  - compared with electromagnetic flowmeter, 487
  - distortion removed by computer, 131
  - injection sites, central and peripheral, 317
  - on-line computation of cardiac output, 379
- and transcapillary exchange, 464

Insulin, potassium and electrocardiogram, 145

Interstitial fluid pressure, measured by implanted capsules, 399

Intraventricular pressure
- and coronary blood flow, 322
- derivatives and first heart sound, 386
- response of ventricle to outflow resistance in absence of, 107

Iodo-antipyrine, coronary blood flow measurements, 58

Ischemia
- renal, and juxtaglomerular cells, 525
- in skeletal muscle, 176

Isoproterenol, heart metabolism, 76

J

Juxtaglomerular cells, characteristics of, 525

K

Kidney
- hypertension
  - and salt intake, 508
  - renal, 241, 553, 562
- juxtaglomerular cells, 525
- pressor function and adrenal cortex, 94
- protein handling by, 573
- renin, 241, 525

L

Lesions
- arterial
  - humoral factor in production of, 291
  - repair processes, 449

Limb circulation, reactivity in hypertension, 3

Lipid, components of xanthomata, 472

M

Magnesium, deficiency in monkey, 642

MER-29, desmosterol and cholesterol in plaques of atherosclerosis, 228

Metabolism
carbohydrate, effects of isoproterenol, 76
of norepinephrine, in heart, 220

Monkey, magnesium deficiency in, 642

Monoamine oxidase inhibitor, prevention of release of thromboplastic substance, 138

Murmurs
in ductus arteriosus, 85
flow and sounds in distensible tubes, 651

Muscle
dinitrophenol on electrical activity of Purkinje and ventricular fibers, 10
heart. *See* Myocardium
skeletal, effective blood flow, 176

Myocardium
in cardiomegaly
cellular changes, 170
properties of, 118
contractility, 597
high-resistance intercalated discs in, 676
systolic resistance in vessels, 203
time-tension relationships, 597

N

Necrosis, cardiac, and electrolytes, 55

Nerves. *See also* Sympathetic nervous system
adrenergic, blockade and neurotransmitter store, 264
renal vasomotor, in the rabbit, 353

Neurogenic control
of arterial pressure, 553
of peripheral resistance, 562

Neurotransmitters, relationship between store and adrenergic nerve blockade, 264

Nialamide, prevention of release of thromboplastic substance, 138

Norepinephrine
and arterial lesions, 449
depletion from heart, 256
effects on venous tone, 539
renal hypertension, 553
uptake and metabolism in heart, 220

Nucleic acid, in cardiomegaly, 170

O

Occlusion, vertebral artery, anesthesia and pressor response, 190

Ouabain
on calcium uptake and tissue calcium in atria, 620
toxicity related to thyroid, 479

Outflow resistance, ventricular response, 107

Oxygen
left ventricular utilization, 163
on renal circulation, 361

P

Para-amino hippurate (PAH), renal extraction ratio, 353

Peptides, vasoactive, relation to protein handling by kidney, 573

Peripheral resistance
carotid sinus reflex, 152
in hemorrhagic shock, 667
neurogenic control in renal hypertension, 562

Phonocardiogram, hemodynamic correlates of first heart sound, 386

Pithing, renal hypertension, 562

Plasma volume
splanchnic circulation
cell percentage and volume, 22
in histamine shock, 29

Potassium
cardiac arrest produced by, 415
cardiac necroses, 55
effect on juxtaglomerular cells, 525
electrocardiogram and insulin, 145

Pressor effects
of increased cerebrospinal fluid pressure and vertebral artery occlusion, 190
renal
and adrenal cortex, 94
and neurogenic control of arterial pressure, 553

Pressure. *See also* Blood pressure
arterial, neurogenic control, 553
cerebrospinal fluid, pressor effect of increasing, 190
interstitial fluid, measured by implanted capsules, 399
intraventricular
and coronary blood flow, 322
derivatives and first heart sound, 386
response of ventricle to outflow resistance in absence of, 107
transmission in pulmonary arteries, 623

Pressure pulse, transmission in pulmonary artery, 623

Protein, handling by kidney, 573

Pulmonary arterial tree
after reduction of pulmonary blood flow, 101
pressure transmission, 623

Pulmonary artery, pressure transmission in, 623

Pulmonary circulation
reduction in flow, 101
venoconstriction in brisket disease, 182

Pulse wave, propagation and reflection in pulmonary arterial tree, 623

Purkinje fibers, effect of dinitrophenol on electrical activity, 10

R

Reflexes
carotid sinus on peripheral resistance, 152
control of systemic venous bed, 539

Renal circulation
carbon monoxide, effects, 361
hypertension, renal, 241, 553, 562
hypoxia, effects, 361
para-amino hippurate extraction ratio, 353
pressor function
and adrenal cortex, 94
and arterial pressure, 553
in unanesthetized rabbits, 353

Renin
inhibition of salt retention by antirenin, 525
in juxtaglomerular cells, 525
in renal hypertension in monkeys, 241

Reserpine
adrenergic nerve blockade produced by, 264
norepinephrine depletion from heart, 256
on reflex venoconstriction, 539
Resistance
to blood flow
carotid sinus and servoanalysis, 152
in deep myocardial vessels, 203
outflow, ventricular response to, 107
peripheral
in carotid sinus, 152
in hemorrhagic shock, 667
neurogenic control in renal hypertension, 562
systolic, in vessels, 203
vascular, in hemorrhagic shock, 667
Resistivity, of body tissue at low frequencies, 40
Reticular activating system, on production of cardiac arrhythmia, 14
Reticuloendothelial system, and arteriosclerosis, 291

S

Salt, effect on renoprival hypertension, 508
Septal artery
flow and resistance, 203
Thebesian drainage, 212
Servoanalysis, carotid sinus reflex and peripheral resistance, 152
Shock
control of vascular resistance in, 667
hemorrhagic, in dogs, 667
histamine, splanchnic blood volume and flow, 29
Skeletal muscle, effective blood flow, 176
Sodium
effect on renoprival hypertension, 508
inhibition of retention by antirenin, 525
Sound
conduction along arteries, 308
in distensible tubes, 651
first heart sounds, hemodynamic correlates, 386
Splanchnic circulation
cell and plasma volumes, 22
during histamine shock, 29
Substrates, relation to protein handling by kidney, 573
Sympathetic nervous system
in renal hypertension
control of arterial pressure, 553
control of peripheral resistance, 562
Systems analysis, and high blood pressure research, 585
Systole, ventricular phases of, 611

T

Tension, time-tension in heart muscle, 597
Thebesian channels, drainage of septal artery, 212
Thoracic surface, distribution of heart potentials, 341
Thromboplastin, release from arterial wall, 138
Thrombus formation, device for quantitative study of, 441
Thyroid, ouabain toxicity and, 479
Thyroxine, cardiovascular effects in hypophysectomized rats, 333
Time relations, of ventricular systole, 611
Tissue
arterial, repair processes in, 449
body, resistivity at low frequencies, 40
calcium content in rat atria, 620
cardiac, release and depletion of norepinephrine, 256
Tracers, transcapillary movement of, 464
Trimethaphan, effects on venous tone, 539
Triparanol, desmosterol and cholesterol in plaques of atherosclerosis, 228
Tubes, distensible, production of sound in, 651
Turbulence, of flow through simulated valves and aorta, 455
Tyramine, renal hypertension, 553

V

Valves, turbulence of flow through, 455
Vascular reactivity, in coarctation of the aorta, 3
Vascular resistance, control in hemorrhagic shock, 667
Vasoactive drugs, effects on carotid sinus reflexes, 539
Vasoactive mechanisms, in hypertension (Proceedings of Council for High Blood Pressure Research, American Heart Association), 523-598
Vasoactive peptides, relation to protein handling by kidney, 573
Vasomotor nerves, renal, in rabbit, 353
Venoconstriction
in brisket disease, 182
guanethidine and reserpine on, 539
Venous bed, reflex control of, 539
Venous tone, effect of vasoactive drugs and receptors, 539
Ventricle
function during halothane anesthesia, 63
intraventricular pressure
and coronary blood flow, 322
derivatives and first heart sound, 386
response to outflow resistance in absence of, 107
left
duration of phases of systole, 611
oxygen utilization, 163
muscle fiber, dinitrophenol on electrical activity, 10
oxygen utilization, 163
response to increased outflow resistance, 107
Ventricular dynamics, duration of contraction phases, 611
Vertebral artery, occlusion, pressor effects and anesthesia, 190
Volume, extracellular, and transcapillary exchange, 464. *See also* Blood volume

X

Xanthomata, lipid components of, 472

Z

Zwaardemaker-Libbrecht phenomenon, and cardiac arrest by potassium, 415
